

## 4PDIH – Public, Private, People, Partnership Digital Innovation Hub

4PDIH is a diverse ecosystem, involving different partners from industry, research and educational institutions, supporting systems for businesses, municipalities and other stakeholders. It offers a supportive environment for development, testing and use of solutions in the field of the latest digital technologies to local communities, i.e. municipalities or consortia, start-ups, economic operators, scientific research institutions, educational institutions, public administrations, NGOs and individuals. 4PDIH works within Laboratory of Telecommunications, The Faculty of Electrical Engineering of University of Ljubljana.

### Issues Faced

- ensuring stable financing
- building trust in the community
- developing appropriate competences, i.e. ensuring HC for the implementation of the DIH
- branding and making sure the community understands specifics, especially advantages of this particular DIH

### Key Objectives

- to serve as a one-stop-shop for digital transformation and digital competence development.
- to create awareness and provide services to grow digital competencies, share digital experience and case studies locally, regionally and internationally, and support the government to adapt regulation and open its data to foster entrepreneurship.
- to provide, connect and support knowledge, business and technology expertise, technologies, experimental and pilot environments, best practices, methodologies and other activities necessary to fully enable Slovene industry, public administration and communities in building digital competencies, innovation models and processes and support their digital transformation

### Main Results

- development of a tool by which prediction of employment trends and competences needed in the forthcoming years will be possible
- enhancing awareness and provision of services to grow digital competencies, share digital experience and case studies locally, regionally and internationally
- support of the government to adapt regulation and open its data to foster entrepreneurship
- connecting and supporting knowledge, business and technology expertise, technologies, experimental and pilot environments, best practices, methodologies and other activities necessary to fully enable Slovene industry, public administration and communities in building digital competencies, innovation models and processes and support their digital transformation
