Rural Digital Hub at the 'Ferme du Marault'

ike the whole economy, agriculture is entering the digital age. The agriculture-innovation report 2025 highlighted the important issue of exploiting digital data for the agricultural world, as well as the need to set up an agricultural data portal. With an increasing number of Applications and digital agri-services use of robots, and drones. We are entering Agriculture 4.0

Issues Faced

* What are the requirements and conditions to make the site a successful open space for everyone: all audiences and all sectors of activity. One which is conducive to exchange, training and implementation of innovative, individual and collective projects? An agricultural-rural FabLab!
* How to showcase the site, its heritage, its history; educate the public

Key Objectives

* Establishment of a local hub and resource centre to network and consolidate a community of farmers and connect the agricultural world with the general public
* Creation of a training and mentoring facility to support the transformation of farming, to experiment, share innovations monitor and benchmark,

Key Objectives

* Make the Marault into a Centre to assist uptake of digital innovations and Agri-tech by hosting a demonstrator

* To create a place for projects co-development, experimentation and agro-digital extension

* Integration of new services: a rural Fablab and co-working space
